GL-0237 DATA SHEET

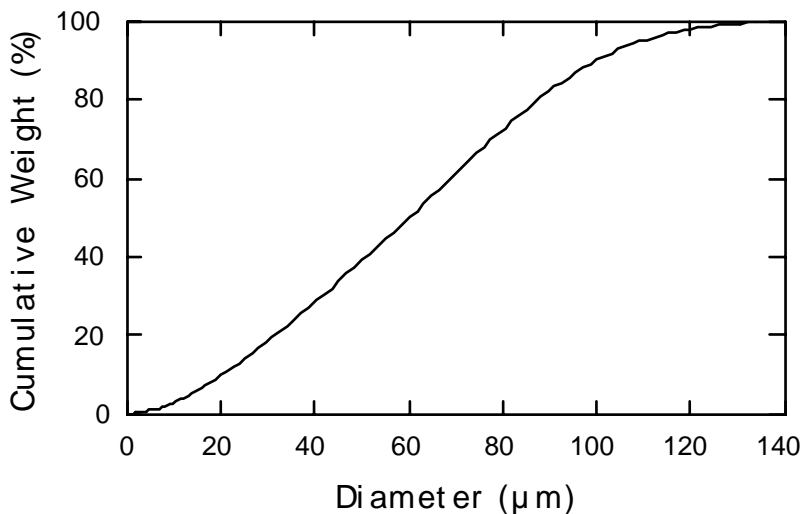

Appearance

Hollow glass microspheres with white color in powder form.

Physical Properties

Specific Gravity 0.15 (g/cm³)
Bulk Density of Dry Beads 0.08 g/cm³ (5 lbs/ft³)
pH in water @ 25°C 9.5
Crush Strength 300 psi

Particle Size Distribution

Applications

GL-0237 is a new, low cost, light weight, hollow glass extender for liquid resin systems offering low cost per unit volume displacement. Since GL-0237 displaces 8 to 10 times its weight of conventional mineral fillers, it will reduce the weight and, therefore, the cost of most products. Parts produced with GL-0237 exhibit excellent staple, screw and nail holding power. The low thermal conductivity of GL-0237 also provides excellent thermal insulation for coating systems.
